15.00 Conference. Slovak students who had created works of video art chosen by their peers and teachers as the most outstanding contribution to the New Media Explorer webpage, gathered, via digital videoconference, to discuss inspiration, techniques and explore the medium more fully. The videoconference, organized by the US Embassy in Bratislava, connected 45 students, professors and artists from Dallas, Texas, Kosice, Banska Bystrica and Bratislava. The discussion was lively and will lead to further cooperation across Slovakia and with the United States in the development of this new medium.
